Torretta a scomparsa/Floor socket

GES R2

Building Connections

OBO
BETTERMANN

Componibile

Le torrette a scomparsa OBO GES R2 rappresentano la soluzione ideale sotto pavimento, dove sono richiesti un aspetto discreto, un'elevata capacità di carico e una versatilità d'impiego.

Uso semplice: i supporti prese sono inseriti in uno spazio compatto e rivestiti da un coperchio.

- Disponibile con coperchio ribaltabile, con uscita a tubo o cieco con chiave di sicurezza.
- Con rivestimento HQ nei colori rame, ottone, cromo o nichel.
- Coperchio ribaltabile o cieco disponibile anche in plastica (IP40).
- Design modulare per differenti applicazioni.
- Supporto prese per 2/4 prese energia e 2 prese cablaggio.
- Coperchi metallici certificati IP66 quando chiusi.

The GES R2 floor sockets are an ideal under-floor solution, when a discreet appearance, a high load capacity and varied functionality are required.

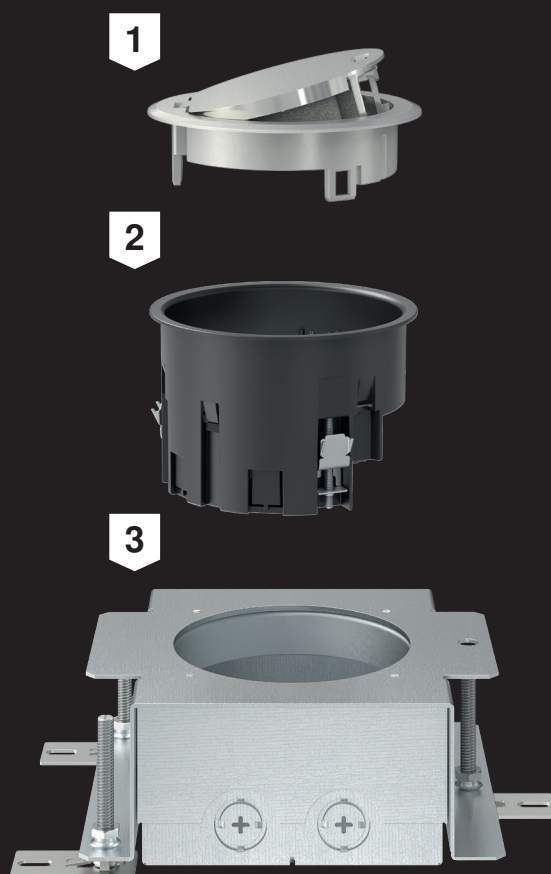

Their handling is simple: Pipelines are inserted in the compact installation space and that space is closed off with a lid.

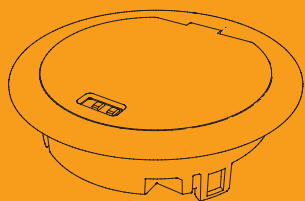

- Available with hinged cover, tube body or blanking lid.
- With high-quality coating in copper, brass, chrome or nickel.
- Hinged cover and blanking lid also available in plastic (IP40).
- Modular design for different application conditions.
- Installation room for 2 sockets and 2 data modules.
- Metal lids IP66-certified when closed.
